Subject: Fire Crew Staffing - Conservation Camp Program

As the fourth year of drought continues to significantly increase California's fire danger, the Conservation Camps Program is also experiencing a reduction of eligible inmates for camp placement. In order to meet these challenges the California Department of Corrections and Rehabilitation (CDCR) in cooperation with the California Department of Forestry and Fire Protection (CAL FIRE) have established the following directive to maintain fire crew strength in the Conservation Camps Program.

Effective immediately:

1. **All authorized CAL FIRE Crews will be staffed with a minimum of 14 inmate firefighters per fire crew.**

To accomplish this directive some of the grade eligible (GE) inmate firefighters currently assigned to in-camp positions will be reassigned to fire crews. If this directive results in significant impacts to camp operations, the impacts will be communicated through both agencies chain of command.

The Camp Commanders and Division Chiefs will monitor in-camp populations and report any anticipated needs to their respective Camp Offices. The CDCR Camp Office shall coordinate with CDCR Headquarters to ensure consistency of inmate population throughout the CAL FIRE / CDCR Conservation Camps Program.

CAL FIRE and CDCR will continue to recruit all available camp eligible inmates to increase the camp populations. CDCR and CAL FIRE are also working collaboratively with multiple county agencies to augment the camp populations with eligible County Boarders. Every effort is being made to ensure enough inmates are available for the program to maintain fully staffed fire crews as well as critical in-camp assignments.

If you have any questions regarding this directive contact:
